

## CONDOMS

# Safe way to bed a veggie

A VEGAN condom has gone on sale in health shops.

The vegi-rubbers are made without the milk-based casing used in other condoms.

Shanip Shah, of Fusion Condoms, said: "Vegans might not have realised there is a milk extract in most condoms.

"We want to help this group make an informed choice about safe sex." There are 180,000 British vegans and three million vegetarians.
